Profile

A motivated Software Developer with a proven track record as a fast learner and a proactive team player. Known for my strong work ethic and commitment to exceeding client expectations. I am eager to tackle new challenges within the tech industry, thriving in fast-paced environments. My ability to quickly adapt to new technologies and effectively collaborate with teams ensures the delivery of exceptional results.

Projects

E-Value

January 2024

Fully responsive full-stack E-commerce website built with TypeScript, React, CSS, and Firebase. The website features a clean, user-friendly interface that adapts seamlessly across different devices and screen sizes. Users can easily browse products, filter and sort search results, manage their favorites, and handle their shopping cart with ease. [Go to project](#)

C4U

August 2023

Clothes 4 You (C4Y) is a front-end mobile-compatible e-commerce product-listing application built with TypeScript, React, JavaScript, and Chakra UI. It offers a seamless shopping experience for users to explore and purchase clothes and fashion items in various categories, including Men and Women, with subcategories like Shoes and Clothes.

Energize-Fitness-Tracker

June 2023

Final project at Telerik Academy

"Energize" is an all-in-one fitness app, providing users the ability to track their calorie intake, create personalized workouts, and set and monitor fitness goals.

It's built using technologies such as React JS, JavaScript, Chakra UI for the front-end, and Firestore for the back-end. Version control was handled with GIT.
